## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18, drawn to a method for modulating a developmental pathway of a plant comprising modifying a gene or modifying expression of a gene, and a plant or plant cell obtained by said method.

**For the election to be complete, Applicants are to elect one gene from the list of genes recited in any one of claims 1, 5, 7, 9, 11, 13 and 14.**

2. The inventions do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the method for modulating a developmental pathway of a plant comprising modifying expression of a gene, wherein said gene is NDR is taught in the prior art. Century et al (1997, Science 278:1963-1965) teach modifying NDR expression due to bacterial or fungal pathogens (abstract and Figure 1D).
3. Applicants' chemical compounds, i.e., different DNA sequences encoding different polypeptides, each have different properties and different core structures that elicit different

Art Unit: 1638

activities; and as such, the different genes are not shared or linked by any special technical feature.

4. Each of the Inventions are capable of being separately made, independently used and the patentability of one does not render the others obvious or unpatentable.

5. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by the literature and sequence searches required for each of the Inventions are not required for another of the Inventions, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stuart F. Baum whose telephone number is 571-272-0792. The examiner can normally be reached on M-F 8:30-5:00.
